This action is in response to applicant's response dated 7/28/04. The delay in response to applicant's response is regretted. An action on the merits follows.

### ***Drawings***

The drawings are objected to under 37 CFR 1.83(a). The drawings must show every feature of the invention specified in the claims. Therefore, the conicity of the threads, as well as the two different sets of threads must be shown or the feature(s) canceled from the claim(s). No new matter should be entered.

Corrected drawing sheets in compliance with 37 CFR 1.121(d) are required in reply to the Office action to avoid abandonment of the application. Any amended replacement drawing sheet should include all of the figures appearing on the immediate prior version of the sheet, even if only one figure is being amended. The figure or figure number of an amended drawing should not be labeled as "amended." If a drawing figure is to be canceled, the appropriate figure must be removed from the replacement sheet, and where necessary, the remaining figures must be renumbered and appropriate changes made to the brief description of the several views of the drawings for consistency. Additional replacement sheets may be necessary to show the renumbering of the remaining figures. Each drawing sheet submitted after the filing date of an application must be labeled in the top margin as either "Replacement Sheet" or "New Sheet" pursuant to 37 CFR 1.121(d). If the changes are not accepted by the examiner, the applicant will be notified and informed of any required corrective action in the next Office action. The objection to the drawings will not be held in abeyance.

Art Unit: 3763

With regard to applicant's remarks, it is still not apparent from Figure 1 how threads 3d and 3e have different conicities, nor how they are two different threads.

Claims 1,2,4-10,13-16 are rejected under 35 U.S.C. 112, first paragraph, as failing to comply with the enablement requirement. The claim(s) contains subject matter which was not described in the specification in such a way as to enable one skilled in the art to which it pertains, or with which it is most nearly connected, to make and/or use the invention.

The claimed features of the threads of the implant having a slight conicity, two different sections of differing conicity, as well as the functional limitations of the bone being forced upon screwing of the implant in a hole in the bone, are not described in the specification. Furthermore, it appears that other limitations found in the dependent claims, such as the conicity, the angle of inclination and the length and height of the implant are not found in the specification.

With regard to applicant's arguments, applicant references the instant specification, specifically page 11, line 25 as supporting evidence. However, it is noted by the examiner that the specification on file only contains 8 pages. It is unclear to the examiner as to what specification is being referred to.

Art Unit: 3763

***Allowable Subject Matter***

Claims 1,2,4-10,13-16 would be allowable if rewritten or amended to overcome the rejection(s) under 35 U.S.C. 112, 2nd paragraph, set forth in this Office action.

Any inquiry concerning this communication should be directed to Nicholas D. Lucchesi at telephone number 571-272-4977.
